

	<b>20-426 comPACT production for PACT443C</b>	<b>Version 1.5</b>
---	---	--------------------

**Study #:** 20-426  
**Patient ID:** comPACT production for PACT443C  
**Responsible Scientist:** Alaina Cagalingan  
**Experiment ID:** 20001705  
**Start Date Of Analysis:** 14th September, 2020  
**Study Objective:** Small-Scale Production for PACT443C  
**Study initially reviewed by:** Pankaj Tiwari (Reviewed on 27 Jan 2021)  
**Study finally reviewed by:** Review Pending (Reviewed on Invalid date)

Data generated passed all acceptance criteria and were stored in the proper folder in the clinical Drive (P) ..\..\03\_SSC.

**Table 1: Summary of the number of comPACT molecules produced and generated with a concentration of 0.85 uM or above.**

ROW Label	#of comPACT molecules	#of constructs made	Sum of Hit Rate(%)	#of comPACTs Expression range(0.85-2 uM)	#of comPACTs Expression range(2-10 uM)	#of comPACTs Expression range(> 10 uM)
HLA-B*07:02	10	59	16.95	3	5	2
HLA-B*14:02	3	59	5.08	1	2	0
HLA-A*32:01	5	58	8.62	2	3	0
HLA-C*08:02	10	59	16.95	3	4	3
HLA-A*33:01	5	58	8.62	3	1	1
HLA-C*07:02	2	59	3.39	2	0	0
Grand Total	35	352	9.94	14	15	6

#### Critical Document

PACT-0101\_0403\_PACT443C\_SSC\_20001705\_imPACTReport\_01OCT2020.xlsx

#### Summary

- 352 comPACT clones were attempted
- 35 comPACT molecules were successfully produced and delivered to the imPACT team for TCR isolation on 19 Jan 2021

- **ADDITIONAL COMMENTS:**

Its very long comment that has been entered by parijat using sql on staging database. It's so fun to type without going through the website. isn't it ? Its very long comment that has been entered by parijat using sql on staging database. It's so fun to
